

LESSONS AND PRACTICAL ON STEM

Filesize: 7.28 MB

Reviews

I just started looking over this ebook. It is actually rally fascinating throgh reading period of time. You wont really feel monotony at anytime of your time (that's what catalogues are for about when you request me).

(Miss Naomie Kohler PhD)

LESSONS AND PRACTICAL ON STEM

To get **LESSONS AND PRACTICAL ON STEM** eBook, make sure you click the web link below and download the document or have accessibility to other information which are have conjunction with **LESSONS AND PRACTICAL ON STEM** ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1870 edition. Excerpt: . . . cally, we ascertain the angles at A and D to be each 37 9, and at C and B to be each 52 5, and the lengths of the lines A E, B D, to be relatively as 1. 000 to 1. 237. Now, inasmuch as the whole thrust can be supposed to be concentrated in the centre of pressure of the blade, and as the 12700 lbs. is in a line with the axis, it follows that, if the line A E represents the direction and amount of this thrust, the line B D, at right angles to the propeller blade at the centre of pressure, according to the resolution of forces, will represent the resultant of the pressures on the blade, or the total pressure tending to break it. But inasmuch as there are three blades, the pressure will be divided equally among them all; therefore, each has to sustain but a third of this pressure; hence 12700 X 1. 237 (proportion B D bears to A E) 52g6 lbs. pressure on each blade at the centre of pressure. The pressure at the hub on each blade equals 5236 lbs. x 41 ins. 214676 lbs. acting with the leverage of one inch. Example 2d. --Suppose, in example 1, the breadth of the blades at the hub to be 32 inches, and the propeller to be made of composition, capable of sustaining a pressure per square inch of cross-section of 520 lbs. ,...
