

## Congressional serial set Volume 1296

Filesize: 1.14 MB

### ***Reviews***

*It is just one of my personal favorite book. I was able to comprehend every little thing out of this published publication. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*(Isaac Olson)*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 82 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1869 Excerpt: . . . as above, becomes aA ftB cC and consequently the chronometer correction (on local sidereal time)  $dt a--(t aA bE eG. ) (6. )$  Reduction of transit observations by application of the method of least squares. Let JT0 the chronometer correction I when ( VT at an assumed middle time T0 (--J ( Il-s I 11 t213. . . the observed times of transit of a number of stars forming a group, corrected for rate, inclination, and inequality of pivots. j23. . . their right ascensions. Ai A2 A3. . . --their azimnthal factors. Ci C2 C3. . . their collimation factors; let also and c. , and JT0 JT ST where T is an unknown correction to an assumed chronometer correction JT; also let and c. , the values of a c and 5T are then to be found from the conditional equations, from which we form the normal equations: 2ST Sa A ScC Sd It is essential for the proper use of these formulae that the instrumental deviations should not have changed during the interval of observation of the group. If the equations are specially used for the determination of the instrumental constants, the stars entering into the group should differ widely in declination and the axis should be reversed near the middle of the group; stars observed at their lower culmination answer the same purpose as a reversal, and should, if possible, be included. Stars observed near the zenith, on both sides of it,...
