

## Description and Strength of Some of the Indian and Burman Timbers (Paperback)

---

By Thomas Skinner

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 edition. Excerpt: .wood is used by the Burmese for posts of houses and cart-framing; from its color and texture it is an excellent wood for furniture; cordage manufactured from the bark is used in India as slow match, by matchlock men. 3. Characteristics and uses.--The tree, with its pyramidal head and the branches, terminating in large panicles of gold-colored flowers, adds not a little to the appearance of the gardens in Madras during the months of November and December, and while it grows to a moderate size in Madras (from 0 to 25 feet in height, and from . to 3 feet in girth) it is said to attain a larger size in the Burman country; and according to Captain Dance's Report, logs having a maximum girth of 4 cubits and 30 feet in length are procurable. The leaves are equally pinnated with 5 to 10 pairs...
