Not illustrated. 1910 Excerpt: .by the Ferro-Concrete Co., under the supervision of their chief engineer, R. F. Moore, who is responsible for the design of the bridge. In this latter work, he was assisted by O. Rosegger, who made most of the calculations in connection with the bridge, these, of course, being checked by myself or staff. The utmost care has been taken in the testing of materials used on the bridge and particularly that of the cement, which has been entirely of local manufacture. The utmost care has also been exercised in checking the setting out of the bridge and the placing of the steel and particularly had this to be the case with the placing of the hinges, on which depended so much the success of the arch. The centering of the main span was of massive construction and contained in all some 400,000 superficial feet of timber, the timbers used being West Australian Jarrah and Oregon Pine. An interesting feature of the centering was the use of screw jacks in lieu of sand boxes, some 160 being employed with very satisfactory results. Slack block and Fox wedges were used to supplement these and to take the main portion of the weight during the course of construction. The arch ribs were built in sections or voussoirs, the placing of the whole of the concrete only occupying 14 working days, not including four days in addition, which elapsed between the placing of the first series of voussoirs and that...
