By United States. Government Office

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 180 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: . . . time taken to remove the sludge is from three to ten minutes, varying with the size of the tank, and very little power is required to rotate the sludge pipe. The method by which the sewage is let into the tank is also of great importance, inasmuch as it causes the effluent-water to become clear and bright, and in good condition to go to the filters. The chemical which we use, called ferozone, is acknowledged to be the best and most powerful precipitant and deodorant known for sewage purification. It is rich in salts of alumina and salts of iron, both in the ferrous and ferric condition. By virtue of its soluble salts it soon causes subsidence of the suspended solids. Ferozone attacks the molecular constitution of that portion of the organic matters in solution which can not be removed by ordinary precipitation in the settling...
