Green Vision is a series of monographs devoted to designers investing their energy, thought and creativity in landscape spaces. Landscape architects, town planners, and even artists who are increasingly incorporating a green landscape and ecological vision into the conception of their projects, offer us a pleasant living environment in concert with nature. Each of these designers shares their passions, their ideas, and their proposals with us. This series offers readers a large variety of visions and methods for approaching landscape management and creation today on different scales. Whether in the form of a clear exposition or a fluid poem, each book, carefully illustrated, documented, and explained, suggests a way of reading, understanding and creating the landscape.
