Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1880 Excerpt: .to follow the asterisk. In connexion with this it should be observed that the determinant in 2 is bound to vanish, from the mere fact that on putting $x = 0$, it becomes an invariant of (o a a, -.aM)(, vYei and that its several terms are what the a elements become when X becomes when 4-Jctj. We are thus led to view the whole subject of invariance under a somewhat broader aspect, as a theory not directly concerned with quantics, but with homogeneous functions in general. VOL. IX. G f being a perfectly general operand, or as we may phrase it, an operand absolute. This enables me to express the idea which was struggling into light when I wrote the antecedent footnote. It is this: Let 0 now be made to do duty for any given homogeneous function of given order X in x, y. The value of F will remain unaltered when we write $X--/t + 1$ ---in place of Y, y (x-/ + a)(x-/ + i)? x This is an immediate consequence of the invariance property of F combined with the fact that previously shown. The numerators in the above expressions are the first terms in the expression for y Y as a function of xX modified by writing successively $X--/ + 1$, $X--(i + 2)$, .X in place of X on account of the powers of X which precede Yf Yf. FM in F and lower the degrees of the operands in respect...
